- Computer Hardware/Software Troubleshooting (10+ years)
- Java (2 year)
- HTML (2 year)

WORK EXPERIENCE

Material Handler, Conestoga Meats, Breslau, ON

January 2019 - January 2024

- Organized products onto pallets based on product type, size, and destination to optimize load efficiency and ensure timely, error-free shipments. Contributed to a 20% efficiency rate
- Loaded pallets onto trucks, ensuring optimal stacking for stability and strict adherence to safety protocols. Attention to detail reduced damage during transport and improved loading times by 15%
- Accomplishments:
- Implemented process improvements in product sorting and palletizing, streamlining workflows and reducing loading times by 20%
- Trained approximately 8 new team members on proper palletizing techniques and equipment operation, leading to a noticeable improvement in team performance
- Skills Used:
- **Palletizing and Sorting:** Drove efficient palletizing and sorting by organizing products onto pallets according to specific orders, optimizing space utilization and expediting loading process, which boosted operational efficiency by 10%
- **Forklift Operator:** Operated forklifts and material handling equipment with precision to safely load products onto trucks, consistently adhering to safety protocols. Maintained a flawless safety record for 5 years
- **Attention to Detail:** Verified accurate placement of products on pallets, considering weight distribution and load stability. Ensured all shipments were secured for transport, reducing product damage and increasing safety compliance by 15%
- **Time Management:** Managed tasks in a high-paced environment, meeting tight loading deadlines, japan shipments needed to be filled by 10 am
- **Adhered to Workplace Safety:** Rigorously enforced and upheld safety protocols, by precise load balancing and expert equipment handling. Kept a flawless 100% safety compliance record

Receiver, Walmart, Waterloo, ON

April 2015 - January 2019

- Received and unloaded trucks using an electric walker and stacker, truck unload time was reduced by 12%
- Set up products and ensured proper placement in store with a maximum set-up time of 10 minutes
- Accomplishments:
- Revamped and optimized backroom organizational system, improving inventory accessibility and workflow efficiency, resulting in a 20% reduction in retrieval time and smoother daily operations
- Improved shelving sorting system, increasing efficiency and accessibility, inventory location time improved by 10%
- Skills Utilized:

- **Inventory Management:** Tracked and managed inventory, ensuring all products were received, counted, and organized, sorted 5 trucks everyday
- **Forklift and Equipment Operation:** Operated electric walkies and stackers safely to unload trucks and move heavy items for 5 years with errors
- **Attention to Detail:** Inspected incoming shipments against purchase orders to ensure accuracy, quality, and compliance with company standards, reducing discrepancies by 10% and ensuring timely resolution of any issues
- **Time Management:** Managed multiple tasks in a fast-paced environment, meeting daily unloading and stocking deadlines
- **Team Collaboration:** Collaborated seamlessly with team members to coordinate unloading schedules, ensuring smooth workflow. Improved overall efficiency by 15% and decreased bottlenecks in receiving process

ACADEMIC PROJECTS

Personal Project, PC Building and Troubleshooting service

January 2010

- Designed and assembled custom computers for personal use and for clients, applying knowledge in computer hardware, operating systems and troubleshooting techniques
- Selected components based on computing needs and budget constraints
- Installed and configured operating systems, drivers and software, including creating bootable USB sticks for OS installation and recovery
- Provided long-term supports, such as hardware upgrading and system diagnostics

Personal Project, IT Support for Friends and Classmates

January 2024

- Assisted peers with computer repairs and troubleshooting throughout academic years
- Diagnosed and fixed hardware and software issues to maintain a working state
- Offered technical advice on device upgrading and cpu optimization

Personal Project, Home Server Build/Setup

January 2025

- Built and configured a custom home server to support file sharing, media streaming, remote access.
- Installed Windows OS With Shared Linux dependencies, and configured core Services (File Share, Firewall, User management.
- Created and managed multiple virtual machines for testing operating systems and applications.
- Focused on hands on learning of server management, networking and virtualisation basics.

EDUCATION

Advanced Diploma, Conestoga College, Waterloo, ON

October 2024

IT INNOVATION & DESIGN

Expected Completion 2027

Ontario Secondary School Diploma, Resurrection c.s.s, Waterloo, ON

June 2015

Major in Information and Communications Technology.
